- SUGGESTIONS
- CONCLUSION

INTRODUCTION

- Managing personal finances is an essential life skill. Proper analysis of income and expenses helps individuals identify unnecessary spending, improve budgeting habits, and increase savings.
- In this project, we analyze the monthly and six-month expense records of Nitin, a graphic designer earning ₹15,000 per month. Using Microsoft Excel, Pivot Tables, Pivot Charts, Conditional Formatting, and Data Visualization, we identify spending patterns, compare expense categories, and provide practical suggestions to improve his savings.

PROBLEM STATEMENT

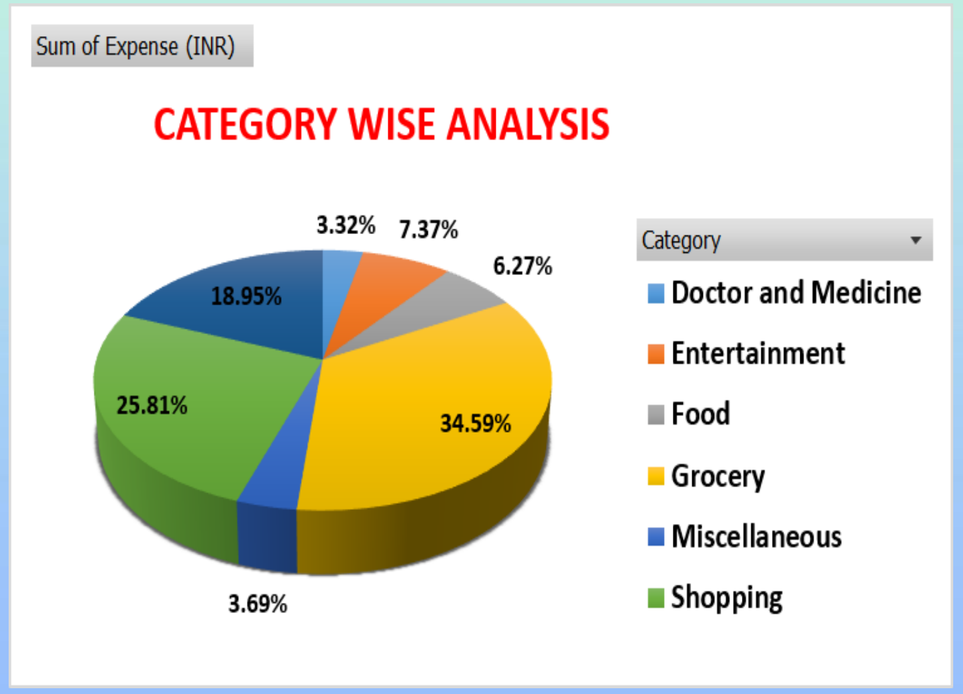

- Nitin works as a Graphic Designer in a new company. He earns Rs 15,000/- per month. He is planning to buy a scooter for his daily commute to the office.
- For the last couple of months, Nitin is not able to save at all for his scooter. His friend Ayush told him that he needed to figure out where most of the money goes and cut down that expense.
- Help Nitin increase his savings by removing some unnecessary expenses.

TASK-1

1. How much is spent for each category (Pivot Table)

➢ Visually represent the amount spent against each category is what percentage of the total expense amount (Pivot Chart)

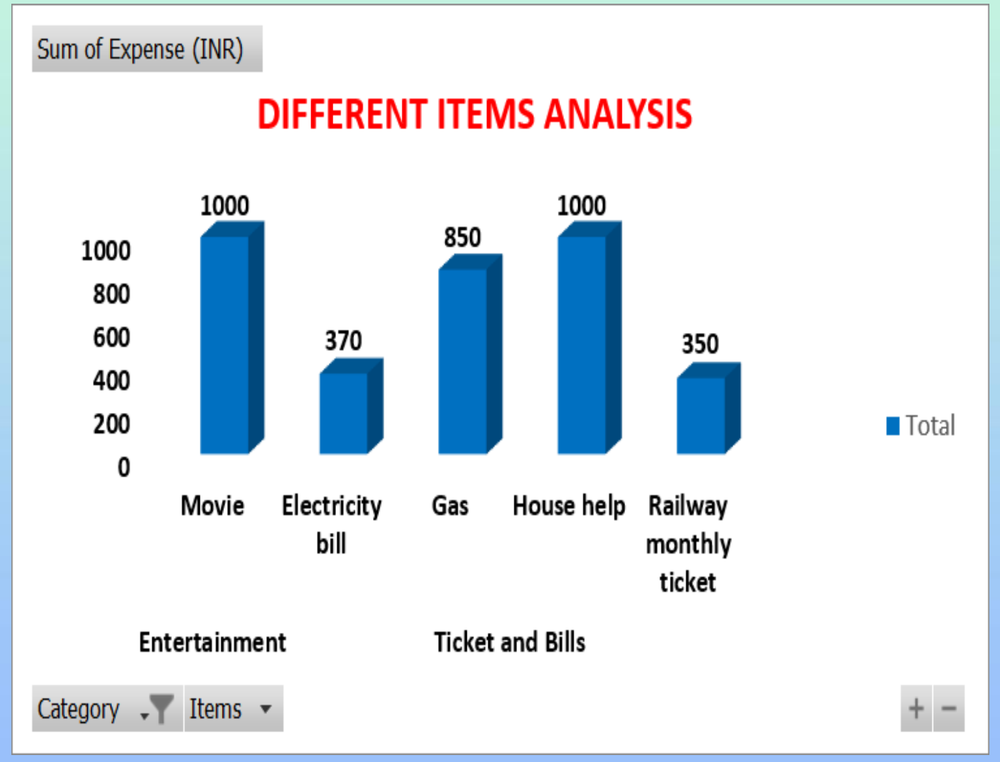

Row Labels	Sum of Expense (INR)
Doctor and Medicine	3.32%
Entertainment	7.37%
Food	6.27%
Grocery	34.59%
Miscellaneous	3.69%
Shopping	25.81%
Ticket and Bills	18.95%
Grand Total	**100.00%**

2. How much is spent on different items of each category (Pivot Table)

- Visually represent the amount spent on different items of Entertainment and Tickets and bills category (Pivot Chart)

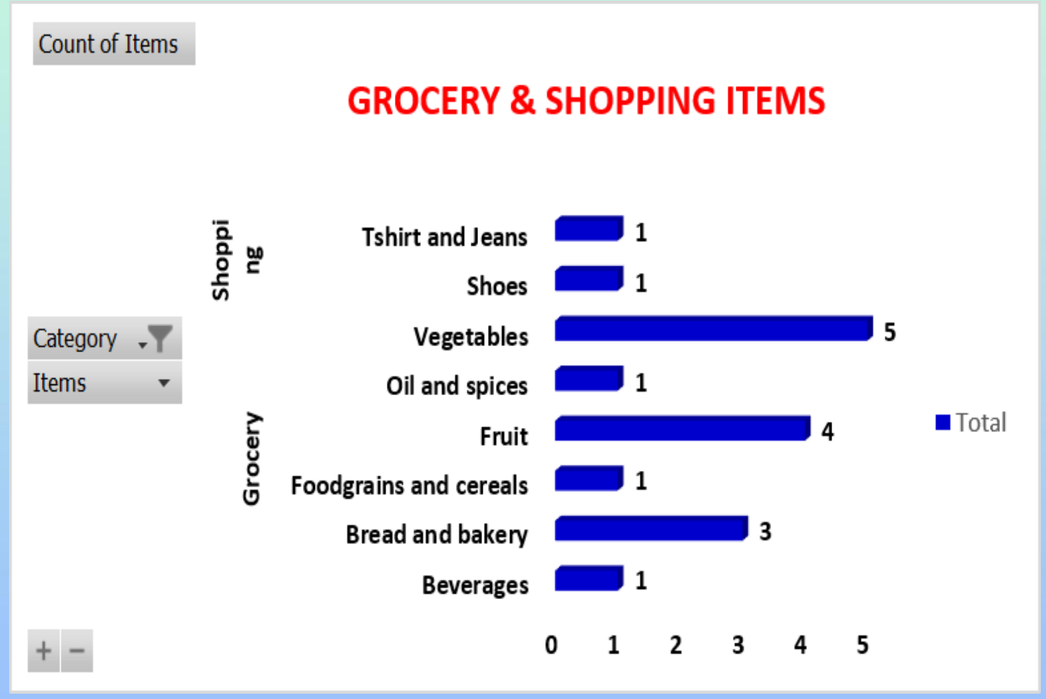

Row Labels	Sum of Expense (INR)
Entertainment	1000
Movie	1000
Ticket and Bills	2570
Electricity bill	370
Gas	850
House help	1000
Railway monthly ticket	350
Grand Total	3570

3. How many times money has been spent against different items of each category (Pivot Table)

- Filter the data to display the data for Grocery items and Shopping items

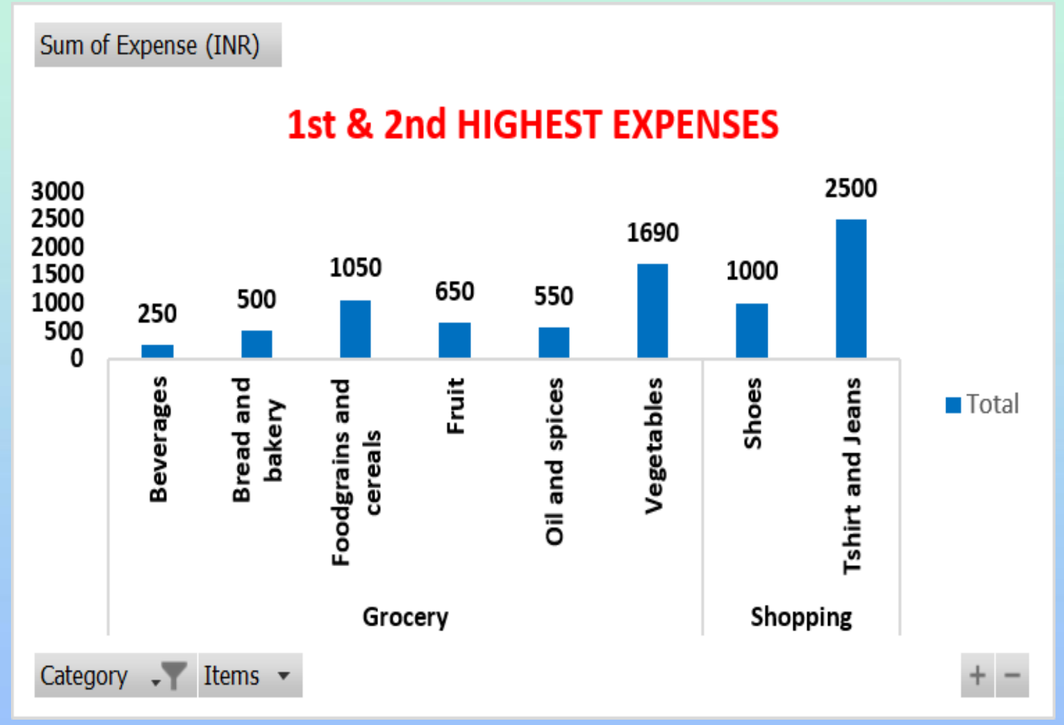

Row Labels	Count of Items
Grocery	15
Beverages	1
Bread and bakery	3
Foodgrains and cereals	1
Fruit	4
Oil and spices	1
Vegetables	5
Shopping	2
Shoes	1
Tshirt and Jeans	1
Grand Total	17

4. What amount is spent on each item of the categories with highest and 2nd highest expense amount (Pivot Table)

- Visually represent the data with data bars (Conditional formatting)

Row Labels	Sum of Expense (INR)
Grocery	4690
Beverages	250
Bread and bakery	500
Foodgrains and cereals	1050
Fruit	650
Oil and spices	550
Vegetables	1690
Shopping	3500
Shoes	1000
Tshirt and Jeans	2500
Grand Total	8190

SUGGESTIONS FOR TASK-1:

1

Reduce Non-Essential Expenses

2

Control Online Food & Entertainment Spending

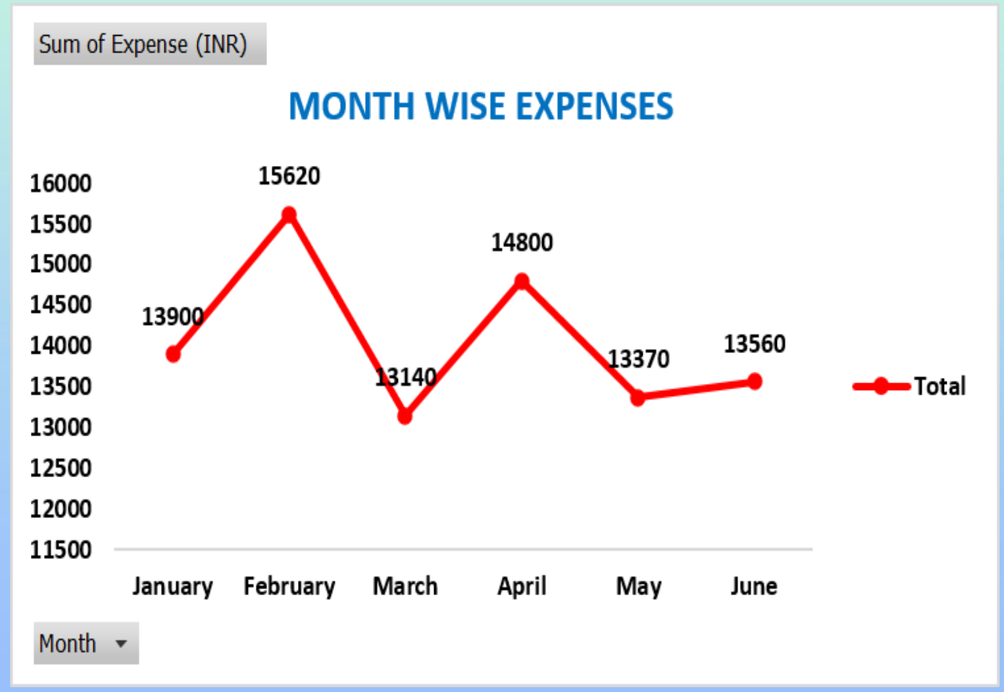

3

Create and Follow a Monthly Budget

TASK-2

1. Month-wise trend of expenses (Pivot table and chart)
   - Find out the month Nitin spent the most

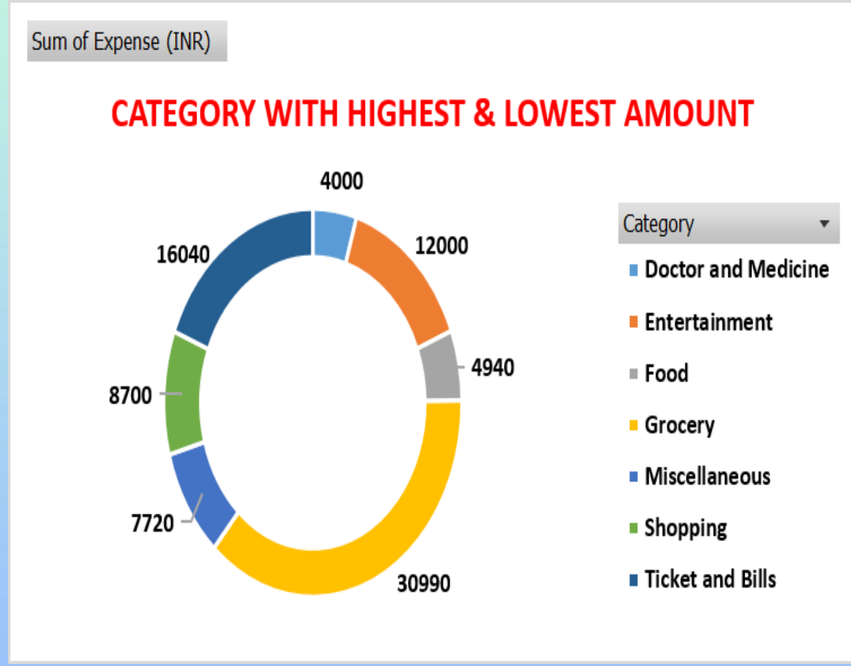

Row Labels	Sum of Expense (INR)
January	13900
February	15620
March	13140
April	14800
May	13370
June	13560
Grand Total	84390

2. Category wise expenses (Pivot table)

- Visually represent it with data bars to display categories with the highest and lowest expense amount

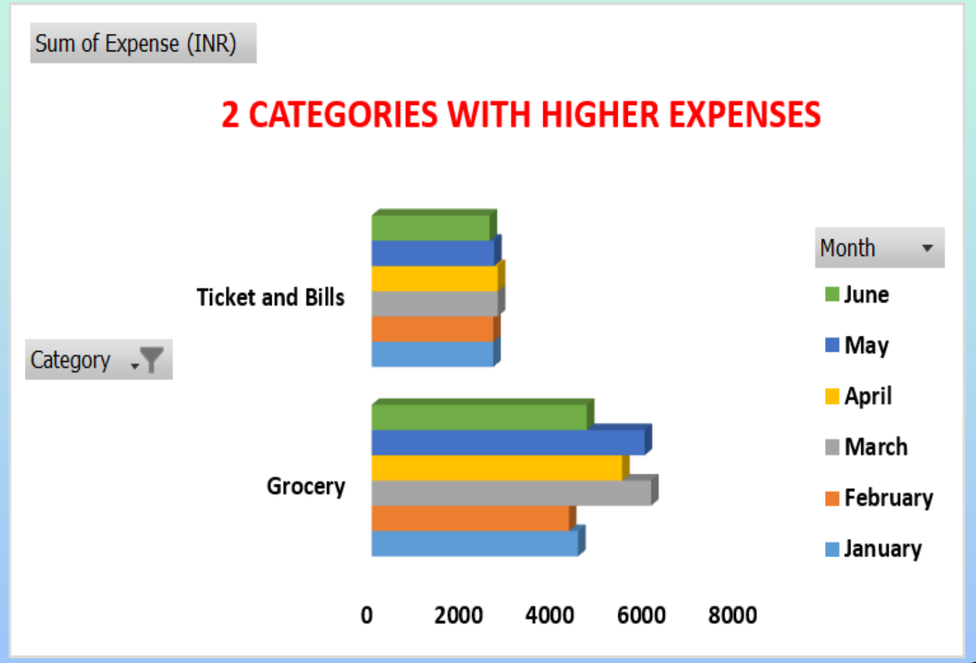

Row Labels	Sum of Expense (INR)
Doctor and Medicine	4000
Entertainment	12000
Food	4940
Grocery	30990
Miscellaneous	7720
Shopping	8700
Ticket and Bills	16040
Grand Total	**84390**

3. Month-wise expense of each category (Pivot table)

➢ Find out 2 categories with higher expenses for each of the 6 months

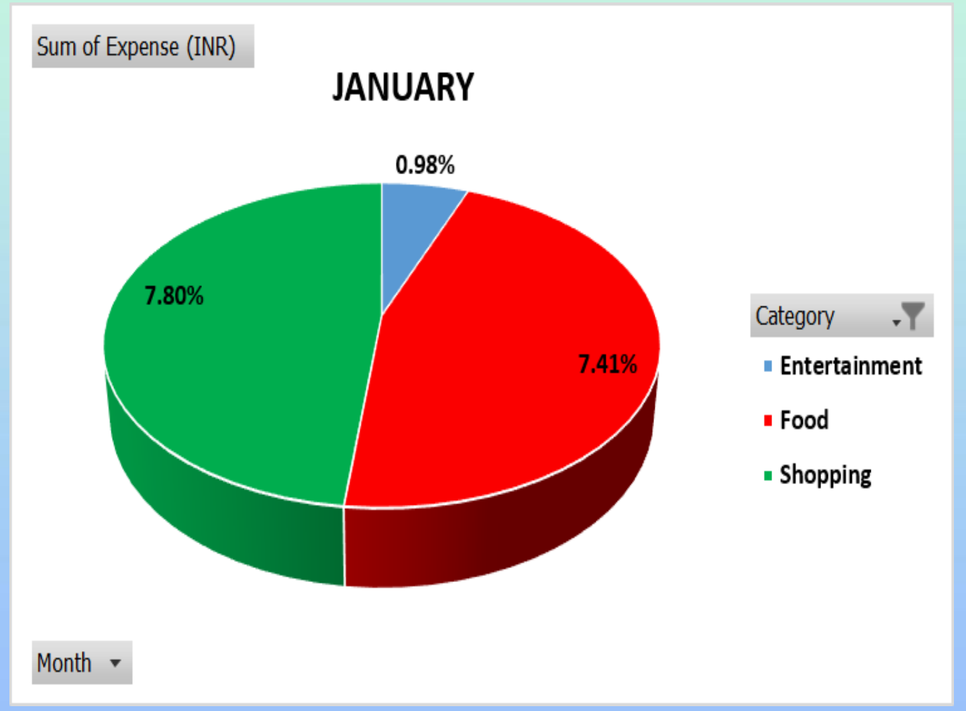

Sum of Expense (INR)	Column Labels						
Row Labels	January	February	March	April	May	June	Grand Total
Grocery	4500	4300	6090	5460	5950	4690	30990
Ticket and Bills	2650	2650	2750	2750	2670	2570	16040
Grand Total	7150	6950	8840	8210	8620	7260	47030

4. How much is spent in each month against different items of Entertainment, Food and Shopping categories (Pivot table)

- Find out which months have the highest amount spent for movies and dining out

Sum of Expense (INR)	Column Labels						
Row Labels	January	February	March	April	May	June	Grand Total
Entertainment	0.98%	29.25%	1.95%	4.88%	5.85%	3.90%	46.80%
Food	7.41%	0.00%	3.12%	5.42%	0.00%	3.32%	19.27%
Shopping	7.80%	0.00%	6.63%	0.00%	5.85%	13.65%	33.93%
Grand Total	16.19%	29.25%	11.70%	10.30%	11.70%	20.87%	100.00%

SUGGESTIONS FOR TASK-2:

1

Monitor Monthly Spending Trends

2

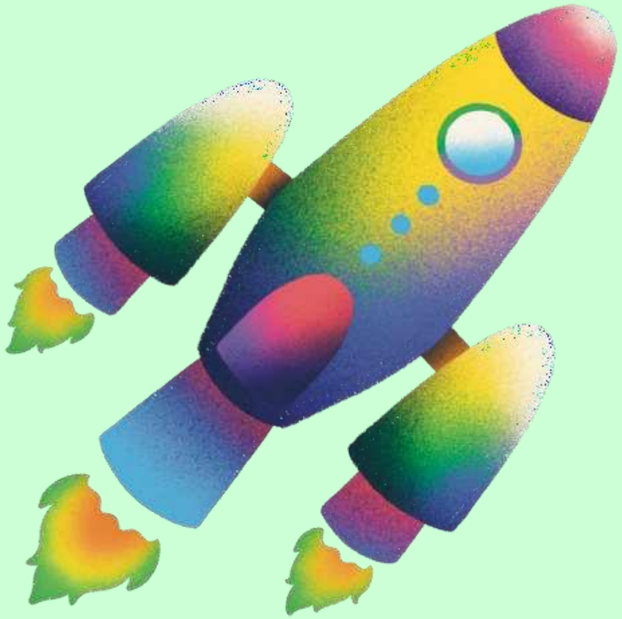

Prioritize Essential Expenses Over Wants

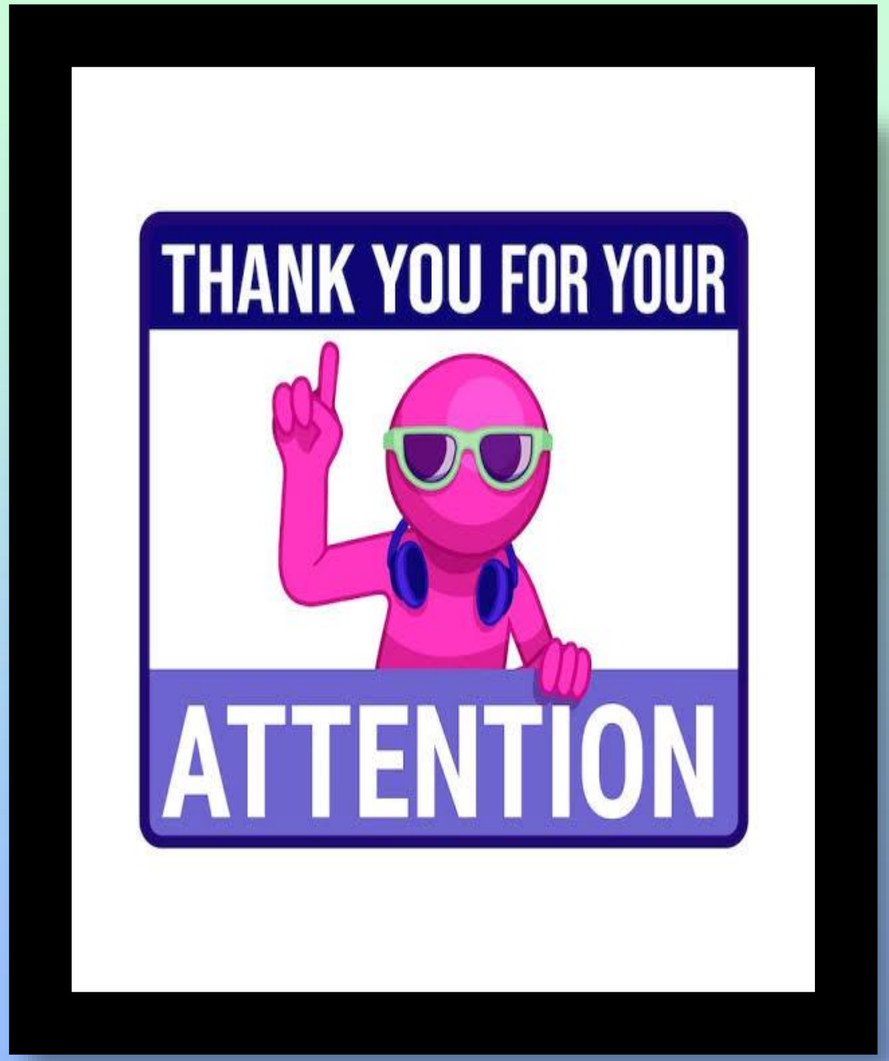

3

Increase Monthly Savings Through Smart Financial Planning

- ✓ This project demonstrates how Excel can be used to analyze and visualize personal expense data effectively.
- ✓ By examining both the monthly and six-month expense records, we identified spending patterns and areas where expenses can be reduced.
- ✓ Implementing the suggested recommendations can help Nitin increase his savings and achieve his financial goal.
- ✓ Overall, the project highlights the importance of data-driven budgeting and expense management.
